

Erasmus+

# ***DISTANCE LEARNING AND DISTANCE EDUCATION. IMPORTANT ASPECTS.***

**Dr. Marat Rakmatullaev**  
Professor of Tashkent University  
of Information Technologies,  
expert of HEREs

# Traditional approach to organize the distance learning

# Distance learning

## Дистанционное обучение

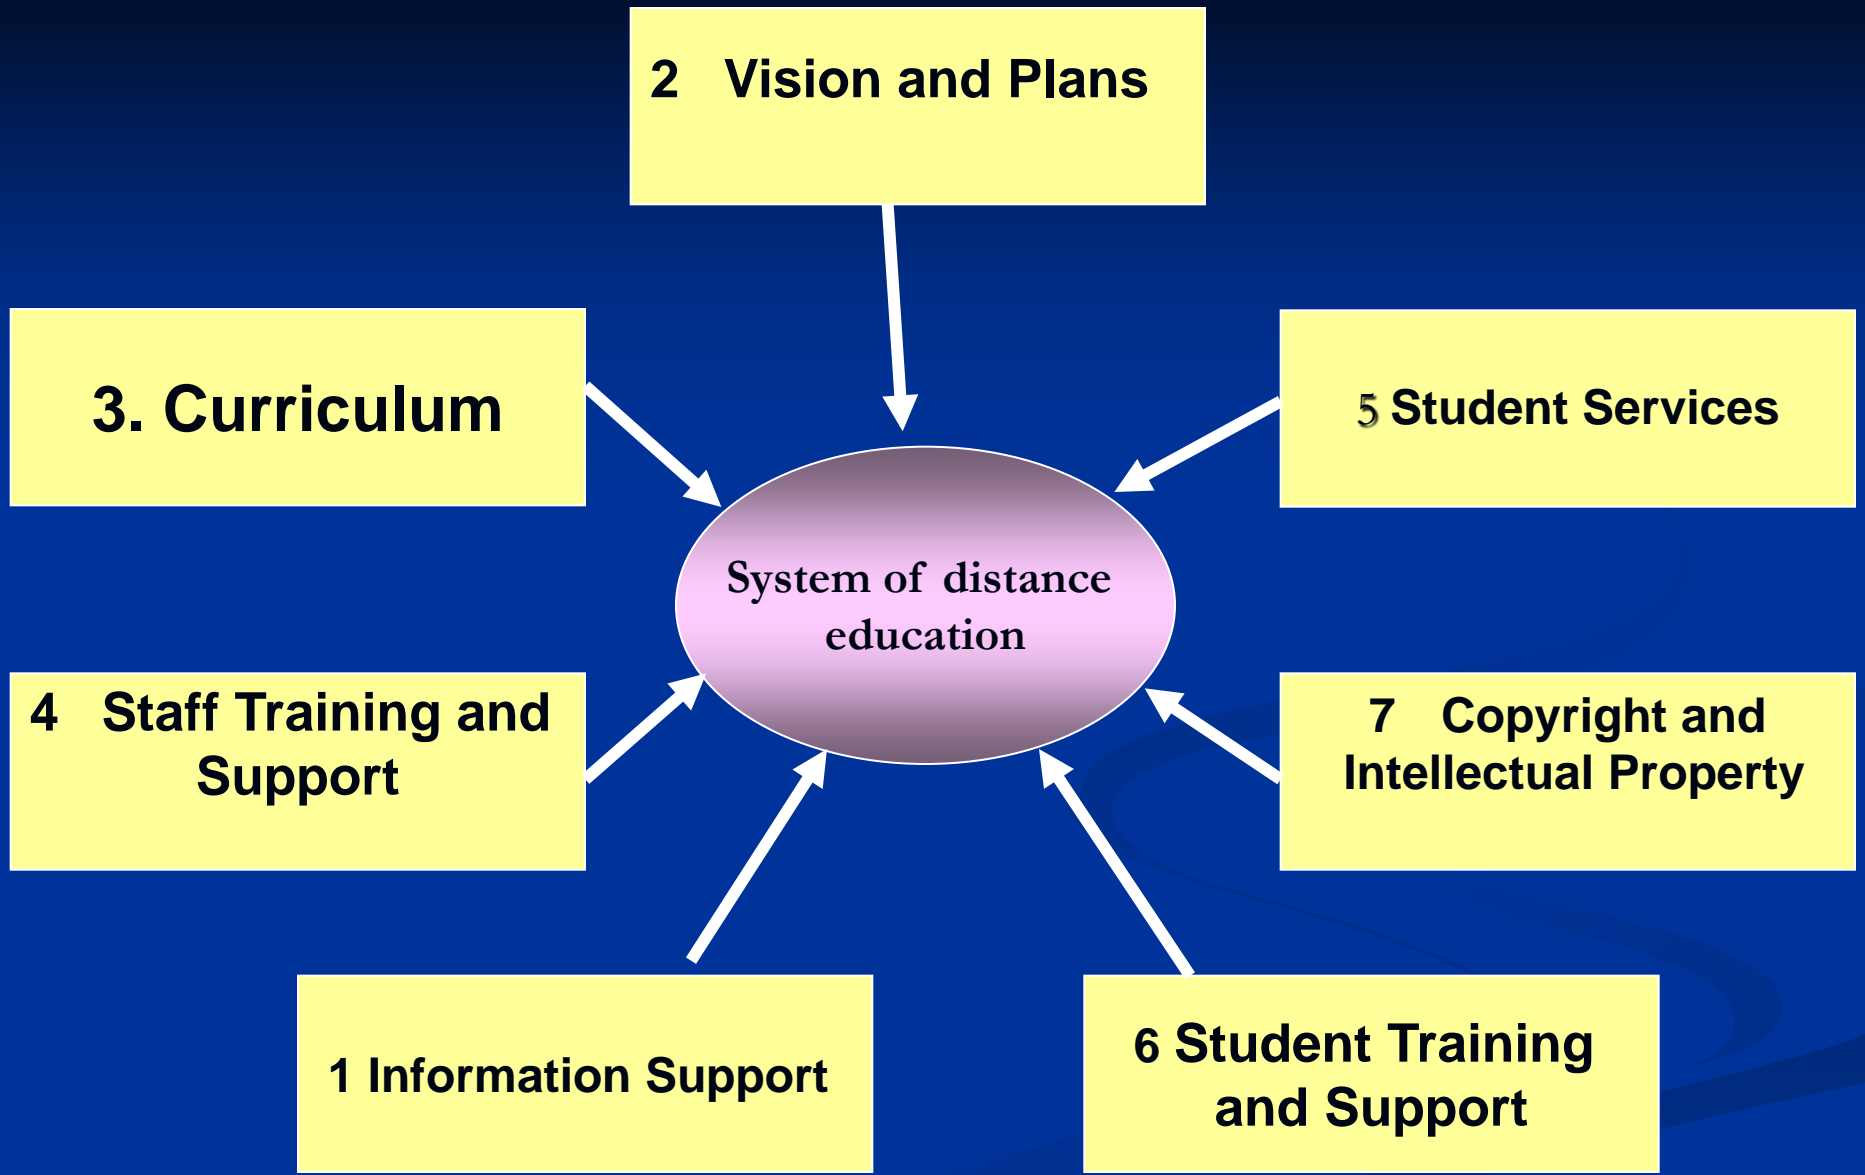

- Training method, based on use of wide spectrum of information and telecommunication technologies to provide access to the educational information (lecture, electronic textbooks, references and others) and checks (including testing) the knowledge irrespective of an arrangement of users in space and in time.
- Метод обучения, базирующаяся на использовании широкого спектра информационных и телекоммуникационных технологий для обеспечения доступа к образовательной информации (лекции, электронные учебники, справочной и другие) и проверки (включая тестирование) своих знаний независимо от расположения обучаемого в пространстве и во времени.

# Tools and bases for distance learning

- Moodle
- MOOC
- ZyoNet
- Corporate Information Library  
Network of universities (+EBSCO, EMERALD,  
Web of Science, OUP, Springer)
- Some web sites of universities and  
scientific centers

- **Distance education** is more than a way of training or method; it is the special and logically consecutive education sphere, concentrated mainly on new methods of representation of information(knowledge) and pedagogical philosophy.
- **Дистанционное образование** – это больше чем способ обучения или метод; это - особая и логически последовательная сфера образования, сосредоточенная главным образом на новых методах представления информации (знаний)и педагогической философии.

*Content is one of the most important aspects of the DL !*

Erasmus+

*Thank you for attention!*
